The Value of Literature Rafe McGregor,2016-08-22 In *The Value of Literature* Rafe McGregor employs a unique approach the combination of philosophical work on value theory and critical work on the relationship between form and content to present a new argument for and defence of literary humanism He argues that literature has value for art for culture and for humanity in short that it matters Unlike most contemporary defenders of literary value the author s strategy does not involve arguing that literature is good as a means to one of the various ends that matter to human beings It is not that literature necessarily makes us cleverer more sensitive more virtuous more creative or just generally better people Nor is it true that there is a necessary relation between literature and edification clarification cultural critique catharsis or therapy Rather than offer an argument that forges a tenuous link between literature and truth or literature and virtue or literature and the sacred this book analyses the non derivative sui generic value characteristic of literature and demonstrates why that matters as an end in itself
