**Fast Software Encryption** Bruce Schneier, 2003-07-31. Since 1993, cryptographic algorithm research has centered around the Fast Software Encryption (FSE) workshop. First held at Cambridge University with 30 attendees, it has grown over the years and has achieved worldwide recognition as a premiere conference. It has been held in Belgium, Israel, France, Italy, and most recently New York. FSE 2000 was the 7th international workshop held in the United States for the first time. Two hundred attendees gathered at the Hilton New York on Sixth Avenue to hear 21 papers presented over the course of three days, 10-12 April 2000. These proceedings constitute a collection of the papers presented during those days. FSE concerns itself with research on classical encryption algorithms and later primitives such as hash functions. This branch of cryptography has never been more in the public eye. Since 1997, NIST has been shepherding the Advanced Encryption Standard (AES) process, trying to select a replacement algorithm for DES. The first AES conference held in California the week before Crypto 98 had over 250 attendees. The second conference held in Rome two days before FSE 99 had just under 200 attendees. The third AES conference was held in conjunction with FSE 2000 during the two days following it at the same hotel.
