Important OSHA Standards Contributing to Fewer Workplace Accidents

Standard 1910.132: Personal Protective Equipment: Protective equipment, including clothing, helmets, goggles and other eye protection, must be used when process or environment presents hazards. Electrical safety equipment or mechanical failures can cause deadly harm.

Standard 1910.147: Lock Out-Tag Out: Before any servicing or maintenance on a piece of machinery, the energy source must be isolated and the stored energy released. This standard is one of the "Big Four" OSHA standards that have saved the most lives.

Standard 1910.119: Process Safety Management (PSM): PSM is a set of procedures designed to prevent a major unplanned release of a highly hazardous chemical. OSHA estimates that 70% of workplace fatalities and 75% of workplace injuries are preventable.

OSHA Inspections: OSHA inspectors conduct workplace safety inspections to ensure that employers are following OSHA safety standards. Inspections are conducted with employers, employees, and safety committees. OSHA inspectors are trained in the use of OSHA safety standards and are responsible for issuing citations and penalties for violations.
