From Observations To Simulations: A Conceptual Introduction To Weather And Climate Modelling Antonello Pasini, 2006-01-16 From Observations to Simulations leads us on a fascinating journey through the methods used for the scientific analysis of complex systems such as the atmosphere and the Earth system from meteorology and climatology as observational sciences to the development of models and the use of computers as virtual laboratories In plain accessible language avoiding technicalities but highlighting the conceptually meaningful aspects the book describes this Copernican revolution in meteorology and climatology a change in methodological paradigm that rigorously tests the definition of some classical concepts such as causality and prediction This is the first book that guides the general public and sets the specialists thinking through research on complex systems which is contributing to a change in our outlook on nature

Role of the Southern Ocean in Atmospheric pCO₂ Change: Observations, Simulations and Paleorecords Zhifang Xiong, Di Qi, Xu Zhang, Thomas Algeo, Jun Zhao, 2025-01-02 The Southern Ocean plays a key role in atmospheric CO₂ sequestration accounting for 40-50% of the anthropogenic CO₂ absorbed by the modern ocean The size of this sink is attributed to strong water mass sinking in a mode intermediate water and bottom water formation which transports carbon to the mid and deep ocean thus isolating it from the atmosphere for centuries The Southern Ocean also played a critical role in atmospheric pCO₂ variations in the geologic past on both orbital and millennial timescales Moreover the Southern Ocean modulates atmospheric and oceanic circulation in the tropics remotely influencing low latitude atmospheric CO₂ exchange Thus the Southern Ocean is a key component of the global climate system whose operation must be better understood at a range of timescales in order to accurately assess its effects on atmospheric pCO₂ in the future This Research Topic will consist of a set of cutting edge investigations of the processes and mechanisms of Southern Ocean influence on atmospheric pCO₂ and global climate change
