cohabitation with animals that characterized every medieval milieu from palace to village The animal encounters of medieval literature reveal their full meaning only when we recover the living animal's place within the written animal The grip of a certain humanism was strong in medieval Britain as it is today the humanism that conceives animals in diametrical opposition to humankind Yet medieval writing was far from univocal in this regard Latin and vernacular works abound in other ways of thinking about animals that invite the saint the scholar and the knight to explore how bodies and minds interpenetrate across species lines Crane brings these other ways of thinking to light in her readings of the beast fable the hunting treatise the saint's life the bestiary and other genres Her substantial contribution to the field of animal studies investigates how animals and people interact in culture making how conceiving the animal is integral to conceiving the human and how cross species encounters transform both their animal and their human participants *How to Study the Animals at the Zoological Garden* Michael Frederic Guyer, 1907 Owls Tom Warhol, 2008 Describes the physical characteristics habitat behavior diet life cycle and conservation status of owls Provided by publisher Botanists and Zoologists Dean Miller, 2014-01-01 In this volume a breakdown of the life and work of some of history's pioneers in the study of plants and animals are thoroughly explored It provides excellent biographical sketches for trailblazers in the sciences Articles are devoted to specific scientists covering their contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience This volume covers names from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century Plant and Animal Ways Illa Podendorf, 1978 Discusses the characteristics of a representative sample from the world's wide variety of animals and plants
